## W.P.I. To Take Part in First Research Day

### N. E. Engineering Societies To Sponsor Industrial Inspection Tours

Worcester Tech will participate in the first New England "Research Day" which will be held Friday, May 20. This industrial inspection and research day is being sponsored by the New England Council and Engineering Societies of New England and the Engineering colleges of New England.

Beginning with a luncheon at Chaffin's at 12:30, this first research day will be inaugurated. At the luncheon, several speakers will outline the research facilities of the city. Immediately after this the entire group will listen to a speech which will be broadcast from Boston to all the group meetings at the different engineering colleges by Carl T. Compton. His subject will be "Research in Industry." Mr. Compton is President of the Massachusetts Institute of Technology and is ably suited to speak on such a subject.

Following this, the groups will take a tour of inspection of the Alden Hydraulic Laboratories. During the remainder of the afternoon, inspection tours will be made of the Norton Company, Crompton and Knowles, the American Steel and Wire Co. and other industrial plants. These tours are mainly for the inspection of the research facilities at the various concerns.

At 5:00 o'clock, Worcester Polytechnic Institute will play host to the men with an inspection tour of the W. P. I. research facilities. At 7:00 P. M., a banquet will be held in Sanford Riley Hall with John F. Tinsley, President of Crompton and Knowles, as the guest speaker. President Ralph Earle and Professor Kenneth Merriam will give short talks on the aims of research here at Tech and also the facilities for research.

A film of the National Association of Manufacturers titled, "Frontiers of the Future," will be shown.

Louis S. Leavitt is chairman of the committee sponsoring the industrial research and get acquainted day. The Chamber of Commerce of Worcester is in charge of local organization.

## S.C.A. Holds Last Supper Meeting Of Year at S.R.H.

### Results of Membership Drive Show 80% of Students Are Members

The final supper meeting of the S. C. A. was held in the faculty dining room in Sanford Riley Hall. Prexy was guest of honor, and he gave an inspiring talk to the cabinet. There was a short business meeting, and then the new officers took charge.

Bob Lloyd was elected Editor-in-Chief of the Tech Bible. This year the S. C. A. has adopted a new idea in

## Ten Days More To The Annual Sophomore Hop

### Let's Have Everybody Out For the Last Open Dance Of the Year

The Annual Soph Hop is only ten days away! In ten days Techites will be dancing to the music of Don Faben's orchestra, will be chatting in the grand rooms of the Worcester Country Club, will be enjoying themselves immensely at Forty's Soph Hop. Remember! the date's May 27, one week from this Friday.

Tell your dates this, fellows—they'll love it. Sometime during the dance trumpets will focus attention on the announcer of this year's Hop Queen. The most beautiful, most appealing, and most charming lady will be crowned as Queen of the Hop. . . . (If your date doesn't have all three properties, best two out of three takes the crown!) From then on in the program, this young lady will preside over the affair.

Tickets are already on sale and going fast. Be sure and get yours while there are some left. Tickets may be purchased from your fraternity representative or from any other member of the Hop Committee. . . . (for these names see last week's issue of TECH NEWS). The price is \$2.50, only two-and-a-half dollars!

Freshmen! this is the last big school dance this year for you, so come around. Sophomores! This is your class dance—support it loyally! Juniors! Remember how you wanted everyone to cooperate with you last year for your Hop? You'll come en masse, won't you? Seniors! This is the last dance open to the entire school that you will be able to attend as under-graduates, you can't miss this last one, come on! Classes of '38 through '41, read those little gray and red circulars and abide by them, for they're words of wisdom, and above all remember that there's going to be a dance at the Country Club Friday after next that you can't afford to miss—the Class of Forty's presentation of the Annual Soph Hop!

trying to make the Hand Book pay for itself. The editor will get 10% of all advertising, and an additional 60% for all that is made over and above the cost of the Bible.

A report on the outcome of the S. C. A. drive for membership was given. As a class, the seniors came first with an average of 95%. The juniors were second, sophomores were third, and the Frosh were last. The average for the whole school was 80%.

In taking over their duties the new officers replaced three seniors. The S. C. A. bids good-bye to Robert Abbe, of Phi Sig, who is the retiring president; Bob Summerville, Phi Gam, who is retiring treasurer; and to Malcolm Sanford who was the non-fraternity dormitory member.

Prexy ended the meeting with a talk in which he thanked the S. C. A. for all the work that it does around the campus. He believes that this organization (Continued on Page 2, Col. 2)

## "So You Want to Be An Engineer"

*Does your brother want "to study to be an engineer," or do you know some high-school boy who seeks your advice? If so, you will be interested in this letter from a practising engineer to his nephew. Case and letter are real, so names are withheld.*

"DEAR BILL:

"You will graduate from high school next June. Your father tells me you want to be an engineer (not just sure what kind), and asks me to advise you regarding your education and summer jobs. I am mighty glad to do this, because I think you have the ability to go places in engineering if you get the right start. For many years I have been thinking about this matter of job preparation and noticing which men got ahead and which didn't and why. I have discussed job training with many college professors and with successful engineers and business men in many industries.

"To get us right down to brass tacks, I have laid out the attached job preparation chart, which sums up my own observations and convictions.

"No two men ever see things exactly alike, yet I feel, Bill, that the average engineer of long experience will admit that this chart is at least 80% right. Certainly all successful business men and engineers agree about the importance of getting along with people and of being able to express yourself successfully in writing and in speech.

"A few engineers, and many of the professors, might claim that I have overstressed the importance of picking up a lot of practical skills before graduating from engineering school. Yet the longer I live the more certain I become that certain elementary skills are as fundamentally useful as Ohm's law and the multiplication table, because they enter into every move the engineer makes in actual life.

"Don't get the idea that you can safely postpone some of these things until after you get your diploma. Did you ever hear of a great musician who confined himself to the theory of music in his early years and didn't start thumping the piano until he was twenty-five? No, youth is the time to learn to play an instrument, to skate, swim, ride a horse, sail a boat, dance, get along with people, run a typewriter. I can't see any good reason why you should wait until after graduation before learning how to write a business letter, swing a hammer, push a file, sell a bill of goods or get along with a bunch of workmen.

## Boston University Captures Eastern Intercollegiate Track Meet at Alumni Field Saturday

### New Wing To Be Added To Chem. Building Soon

### Modern Lecture Hall For Physics and Chem. Depts. Included in Addition

The Salisbury Laboratories will undergo somewhat of a modernizing process during the summer months. The present quantitative and qualitative laboratories located on the fourth floor of the building will be rearranged and fully equipped with new benches, and the hoods, used for carrying away unwanted gasses, will be removed and replaced with one large hood in each of the two laboratories. The small room between the two laboratories will be renovated and used as a preparation room for both. The biggest improvement will be the addition of a new wing to the north side of the building, the side facing the Electrical Laboratories. This new wing is to contain a large, modern, lecture hall for the joint use of both the Chemistry and Physics departments. For this reason, use of the second and third floor lecture rooms will be discontinued in favor of the new lecture hall. This addition is expected to provide a great amount of extra floor space in the chemistry department, which has long been needed.

(Continued on Page 2, Col. 5)

## Debating Club Holds Meeting

### School Team To Be Picked By Group Soon

Meeting for the first time since its organization in April, the W. P. I. Debating Society reintroduced forensic activity to Tech last Monday night, May 9, with a forum discussion by its members on the subject: "Resolved: That a Department of Education be created with its head a member of the President's cabinet."

Speaking for the affirmative were: Walter Gruzdis, Frederick F. White, and James Walter. The negative was upheld by Richard Coleman, Clayton Allen, and Sidney Soloway. After the presentation of the formal arguments, the discussion was opened to all the members and a lively period of general debate followed. Following the discussion a resolution was adopted by the society in favor of the affirmative Dean Emeritus Coombs, honorary advisor, and Professor Swan, faculty advisor, were in attendance at the meeting and favored the members with constructive criticism and advice at the close of the debate.

One of the major objectives of the society is the selection of a varsity debating team and, in anticipation of the

### Connecticut State and Tech Trail Winners With Only Three Point Margin

### NEW RECORDS MADE

### Tufts, Middlebury, Mass. State, Trinity, and Vermont Also Enter Competition

Boston University won the annual Eastern Intercollegiate Track Meet at Alumni Field last Saturday, May 14, with 32 points. Second place went to Connecticut State with 31, and third to W. P. I., with 29½. From a spectator's standpoint it was a very satisfying meet for the points were divided evenly over all the schools participating, and no one college dominated in any of the events.

Tech's hopes for a first place died when LaLiberte, in the 880, got off to a bad start, and, boxed by other runners, could not get into his stride. He did not place, though he certainly is a faster man than Quackenbush of Middlebury or Quinlan of Tufts who placed third and fourth.

But Tech without Mal Chandler would still be down about sixth place, for it was his great work in winning the discus and hammer throw and making a close second in the shotput that gave Tech 13 of her 29 points. Just as important as winning those two events was the fact that Mal broke two school records in doing it. The school shotput record of 43' 3¾" he raised to 43' 9" and, in competing in the discus, his throw of 127' 1¼" broke the record of 126' 11". Not satisfied, however, with one so close to the mark, he threw again and this time sailed that discus for a distance of 130' 5¼".

Carl Fritch came through with ten points for Worcester by winning both the hundred and the two-hundred yard dashes. In the hundred he tied both the school and the meet records of 10 seconds. Minalga, Cameron and Wackerbath were the other point scorers for Tech.

Luczal of Connecticut could have put his team into winning place if he had started his sprint in the two mile run about a quarter of a lap sooner. As it was he was but a step behind Nygaard of Tufts and still gaining when the two of them crossed the finish line.

The prettiest race of the afternoon was the Freshman Medley Relay, an event which did not count toward points in the meet. It was won in beautiful style by the Tech team with Connecticut a close second. "Butch" Nabochick gave his team a good lead in the starting 440 yd. lap. Then both Ralph Frazer and Ed Pacek ran both their laps in good time. The other teams seemed to be just "hanging on." The last lap was a half mile with Les Harding carrying the baton. His was the job of holding off that strong Connecticut State team, for by this time they had gained considerably on the other schools. In the middle of the

### English Versus Engineering

Since the founding of Worcester Tech in 1868, embryo engineers have kicked about taking a course in English. But English still remains on the curriculum of W. P. I. and all other good engineering schools. Why? That is the question that we will attempt to make clear.

Which of the following directions would you rather follow in conducting an experiment? One that was vague in form, illiterate and inexact in details and grammar, or one that was precise, clear, literate and exact in details and grammar. You would naturally pick the second, but how can you as an engineer ever hope to write such reports or directions if you do not know the fundamentals of good use and grammar in English? You can't.

Imagine if you can the predicament of a man who can speak French fluently but who only knows a few English words. In French, he can explain his ideas, his thoughts and so forth to anyone but can he do it in English? No. Compare this man to the engineer who has a small vocabulary and little knowledge of English. He may have an idea in his mind which will revolutionize the world of science and industry but if he can't get it across to his colleagues with his English, he is in the same predicament as the Frenchman.

These last two arguments point toward English courses. But on the other hand, according to Sanford A. Moss of G. E., the two courses in English which he has had had an absolute value of zero. One course emphasized a large vocabulary of unusual words while the other specialized in fine and elegant writing. Mr. Moss says that a course in English, which omitted literature and emphasized instead the writing of direct, simple, precise statements, would be infinitely more valuable. Note that he is speaking for the engineer and not the arts and science student.

J. C. Elgin, professor of chemistry at Princeton, says: "A man who cannot use English efficiently is definitely handicapped because he can't convey his ideas to others."

Robinson of G. E. says: "The continuing or rejection of a new project

depends at some time or other on a report. If the researcher writes a poor report and does not get his ideas across to his colleagues, then the project is dropped."

J. Bennet Hill of the Sun Oil Company says: "A man is judged by his reports and not by his work."

Other comments are: "English is as important as Mathematics and Physics." "English is a tool for expressing and shaping ideas." "A man with a cultured background can meet influential men on their own level. Other things being equal, this man will get the business." The approval of English courses continues throughout the business and industrial world in a similar fashion. To summarize: first, English is necessary to convey ideas to others; second, English forms a cultural background which is the basis for meeting influential people; third, English study develops that power to think logically and consecutively.

### Debating Club

#### Holds Meeting

(Continued from Page 1, Col. 4)  
 formation of a team in the fall, it was decided to devise a plan now under which the members of the team can best be chosen. President Coleman was empowered to appoint a committee to draw up and submit such a plan. A committee consisting of Sidney Soloway, Walter Gruzdis, and George A. Cohen was appointed to draft a constitution for the club. It was further agreed upon that decisions should be eliminated from all except formal debates, but that the society should adopt resolutions in favor of one side or the other at the close of the panel discussions.

The last meeting of the school year will be held next Monday evening, May 23, at which time a debate will be given on the subject: "Resolved: That the closed shop should be universally adopted."

Interested students are invited to attend.

## "So You Want to Be An Engineer"

(Continued from Page 1, Col. 3)

### Land on Four Feet

Before I explain how to use the job chart, I must deliver one more piece of advice, based on long experience and observation. You've probably read inspiring stories about men who start young preparing for one specific job. In general, I don't think it's a good plan, although there have been spectacular exceptions. I'm not underestimating the importance of having a definite purpose in life, but feel that too-early specialization is very dangerous. Observe the ways of the cat, Bill. She knows more than one way to jump. Her outstanding talent is the ability to land on four feet under any and all circumstances.

"To be safe you've got to be versatile. How many men today are actually in the jobs they picked for themselves 20 or 30 years ago? How can you be sure about what you will be doing in 1958? When that day arrives, the job you planned may not even exist, or the rapidly changing world may have created a new, and much better, opportunity for you somewhere else. There is always a lot of chance and uncertainty in human affairs. Above all things, prepare yourself to land on four feet no matter where you are tossed. That means being able to do those simple every-day things that enter into all jobs everywhere.

"I hope you get this point, because it is important. Don't decide right now that you are going to be an air-conditioning engineer or a diesel engineer (whatever that is). Train yourself in the general fundamentals of mechanical and electrical engineering. At the same time, acquire some skill in the simple every-day operations of all engineering and business occupations. I repeat, start right now learning how to talk and write English, work with people, sell, handle tools and machines, write business letters, keep simple accounts. Then you will be equipped to make a living with your hands and end as far up the line as your head, your adaptability, your energy and your good luck can carry you."

## Department Notes

### Electrical Engineering

On Tuesday, May 10, the Student Branch of the A. I. E. E. held their election of officers. William R. Regan was elected the new chairman. David G. Howard Jr. became Vice-chairman, Robert B. Mirick, Treasurer, and John H. MacLeod, Secretary. Professor Victor Siegfried was chosen Counselor. After elections Mr. W. H. Bigelow, of the Bigelow Electric Company in Worcester, gave an informal talk on experiences in repairing machinery and in electrical contracting.

## Paul Johnson New President

### Officers of Tech Outing Club Elected May 9th

At its last meeting of the season Monday, May 9, the newly formed Tech Outing Club elected the officers for the coming year. Paul Johnson was chosen president, Don Houser, vice-president, and Bob Dunklee, secretary-treasurer. Following the short business meeting, the members of the club were entertained for three quarters of an hour by motion pictures of winter sports in Switzerland, and Lake Placid. Several members told of their experiences spring skiing in Tuckerman Ravine.

The first reel showed slalom, and cross-country skiing, and ski jumping at its best in the mountains of the Lake Placid region. Expert figure skating in all its forms furnished thrills and spills in the second reel. The third film was taken in the beautiful snow covered peaks of Switzerland. Picturesque landscapes were mingled with schusses, cristies, telemarks, and even sitzmarks.

The constitution, newly copied, was signed by the following members: Eric Mager, Fred Wackerbarth, Arthur Dinsmore, Mel Knapp, Lloyd Greenwood, Stan Potter, Bob Brautigam, Art Koerber, Charles Powell, Bob Dunklee, Dave Howard, Dave Hunt, Walter Knight, Willard Gove, Ken Dresser, and Clarence Ashcroft. About twenty members attended the meeting, and several more were unable to attend because of other engagements.

## Ninety Couples Brave Rain For Big Dorm Dance

### Final Dance to Boyntonian's Music Will Be Held In Gym June 4

A Dorm Dance will be held in Sanford Riley Hall Saturday, May 21, from 8:30 to 12:00. These ever popular dances started their Spring season with a dance in April. Saturday 87 couples were in attendance at the dance by 9:30 in spite of inclement weather.

Chaperones for the Dorm Dance of this coming Saturday will be: Prof. and Mrs. Paul Swan, Dr. and Mrs. A. J. Schweiger and Prof. and Mrs. M. L. Price.

In June the band will lose their most valuable instrumentalist and player, Freddie Banan. For three years, Banan (Continued on Page 3, Col. 4)

## Frosh Cinch '93 Goat's Head

### Late Spurt by Sophomores in Interclass Race Fails

This year, for the second time since the Goat's Head Trophy was presented by the class of 1893, the Freshman Class has won it. The class of 1938 won it in their freshman year, as well as their sophomore year. This year's battle seemed to be one-sided, but as the year advanced it was anybody's trophy, until two weeks ago when the Freshman bowling team took the one point needed for victory.

Last October, the Freshmen started out by taking the Sophomores over in the annual rope-pull. In a pouring rain (Continued on Page 3, Col. 3)

## LOVE SONG TO AN OPERA FIEND

I  
 I think there's nothing more nefarious  
 Than Chopin on a stradivarius;  
 That Wagner's stuff is now passé,  
 Or definitely declassé.

Now tear it down with Raz-ma-taz  
 And build it up with Za-zu-zaz,  
 With saxophones, and trumpet licks,  
 And rhythm from those flyin' sticks!  
 Johann Strauss  
 Is a louse.  
 I'd rather see  
 A Mickey Mouse!

II  
 I hate to hear them sing in wop  
 And think that Carmen is a flop  
 A slon piece you think idyllic  
 Strikes me as almost Willy-Nillic.

I want to raise hell Minnie-moochin'  
 To Calloway, or Webb, or Duchin,  
 Or go to town in Southern style  
 With that sweet cookie, Honey Chile!  
 I say nertz  
 To works of Goetz!

III  
 There's nothing worse than great  
 sopranos  
 Accompanied by grand pianos,  
 Unless it's those distasteful moans  
 Of tenors great, or baritones.

I'd rather truck, and Susie-Q,  
 Or swing into the goona-goo,  
 Than feel quite like a silly goose,  
 While sleeping through the Ballet  
 Russe!

I'm out of place in high wing collars  
 And broken seats that cost six dollars.  
 But that's your life—it's part of you  
 So honey lamb, I guess we're through

This is the end—I can't stand Brahms.  
 Go back to your stuffy Av'nue Hams.  
 While you're up there in your Toney  
 Highland  
 I'm off with a blonde to Coney Island!

## New Wing To Be Added To Chem. Building Soon

(Continued from Page 1, Col. 4)

Two new courses will also be added to the present curriculum and a few changes made. The new courses comprise a study of Chemical Engineering design and a course in Chemical Engineering Calculations, both available to seniors during the second term. Besides these, a course in Sanitation will become elective and the present course in Metallography, and Semi-Micro Analysis will become a part of the regular qualitative analysis course.

# Bodreau Leads W.P.I. Batters To Second Win

## Bashes Out Trio of Singles In Twelve Hit Attack On Trinity

Behind the effective pitching of south-paw Al Raslavsky and the hard hitting of the other Engineers, the Worcester Tech baseball team redeemed itself in the eyes of its supporters at the expense of the Trinity nine, 5 to 1, at the Alumni Field diamond last Wednesday afternoon.

Captain Al, the Worcester mound ace, allowed the visitors only four hits after their two hit tally in the first, making a total of six hits for the Trinity club. So baffled were the boys from Hartford after Ras settled down that they failed to make another scoring threat.

Each of the hurlers had nine strikeouts to his credit, but the Boynton Hillers smacked out twelve hits to Trinity's six. Leading the hitting attack was catcher Alex Bodreau who surprised the fans by bashing out three long singles out of four trips to the plate. Close behind were Jack Rushton, rangy Engineer first baseman, and Elmer Scott, each of whom has two good clean hits to his credit.

The Connecticut club started off like a house afire as leadoff man Ralph Shelly hit Raslavsky for a double to the left field bank. The next man at bat took his three, but was followed by Trinity captain, Bob O'Malley, who lined a single over second to score Shelly from second. The next two batters were retired in order, to end the threat.

With the visitors ahead one to nothing, the Worcester boys came to bat with fire in their eyes, and Frankie Gustafson hammered out a long triple deep into center field. Don Atkinson was placed on first via a walk but Ray Forkey whiffed. Raslavsky hit a hard grounder to short, the shortstop trapped Gus between third and home and tagged him out. When all looked dark and gloomy, Jack Rushton appeared at the plate and dropped a beautiful Texas leaguer into short left field. Atkinson arrived at the home plate from second base in time to tie up the score.

Neither team sent another runner across the plate until the last of the third, when the Engineers again went at it hard and heavy to come up with three more runs. Don Atkinson drove a single by short and advanced to third as Forkey popped one over first base, just inside the foul line. Rushton sent a grounder to second, Atkinson scored and Forkey was tagged out at second. Bodreau then clubbed one out into the left garden to score Rushton. Elmer Scott reached on shortstop Jackson's error and Chunky Alex beat it home for the Biglermen's fourth run.

Nothing else of consequence happened until the last of the seventh when Al Raslavsky socked out a double to left field. Rushton drove him home with a clean single to center, to complete the scoring.

Score:

# Phi Sig Rolls On At Head of Ball Standing

## A.T.O. Loses Its Star Pitcher, Rainy Weather Mars Play Of Past Week

Phi Sig is making a heavy bid for the interfraternity baseball cup as the second half of the baseball season gets under way. The rest of the league is in such a mixup that even an Einstein could not figure out in what order the other teams will place. Last week the baseball games were marked with rain and more rain. The players out in the field were singing, "But the rain got in my eyes" as they dropped the flies.

The big game of the week was the one between A. T. O. and P. S. K. This was a tough game for both teams, and not until Phi Sig collected three runs in the sixth was the game over. A. T. O. sure missed the pitching of Gibbs. He is out for the season with a broken rib.

In a downpour of rain on Friday the 13th Phi Gam was defeated by S. A. E. This was another one of those extra inning affairs. This game was one of which team could slide around in the mud the best and not one of which team could play baseball the best. The final score was S. A. E. 8, P. G. D. 7. This moved S. A. E. nearer to the Grand Trophy.

T. X. who has had a fair season up to now, beat S. A. E. 3 to 2. This was a pitcher's battle all of the way. Bob Sullivan, who did not do so well against T. K. P., certainly redeemed himself in this game. The game was tied up 2 all as the last of the fifth rolled around. T. X. managed to get a man across home plate to win the ball game in this last half inning of the ball game, thus keeping the game away from an overtime.

S. O. P. lost both of its tilts of the week. L. X. A. beat them 20 to 9, and S. P. E. beat them 11 to 8.

### Standings of the Teams to Date

	Won	Lost	Ave.
P. S. K.	4	1	.800

# B. U. Wins Inter-collegiate Track Meet

(Continued from Page 1, Col. 5)

last lap Cunningham of Connecticut put all he had into passing Harding but Les also had plenty of fighting spirit. He put on a spurt which kept Cunningham behind and which, by the end of the race, had become a lead of ten feet. The meet by events:

Shotput: Bernard, B. U., 45' 2 3/4"; Chandler, W. P. I.; Fienman, B. U.; Pollard, Tufts.

Discus Throw: Chandler, W. P. I., 127' 1 1/4"; Robinson, Conn.; Neddies, Conn.; Chotkowski, Trinity.

Hammer Throw: Chandler, W. P. I., 147' 7 3/4"; Cridland, Middlebury; Crompton, B. U.; Williams, Conn.

120 yd. Hurdles: Clapp, B. U., 16.4 sec.; Allen, Vt.; Spence, Conn.; Suitor, Vt.

100 yd. Dash: Fritch, W. P. I., 10 sec.; Smith, Vt.; Williams, Middlebury; Johnson, Conn.

Mile Run: Quinlan, Tufts, 4 min. 23.4 sec.; Rice, Conn.; Cameron, W. P. I.; Wilson, B. U.

Freshman Medley Relay: Won by Tech, Naboecheck, Frazer, Pacek, Harding. Time, 3 min. 38 sec. Second, Connecticut State.

440 yd. Dash: Raymond, B. U., 50 sec.; Hanson, Middlebury; Little, Mass. State; Pankratz, Trinity.

Two Mile Run: Atkinson, Tufts, 10 min. 4.8 sec.; Nygaard, Tufts; Luczai, Conn.; Johnson, Conn.

880 yd. Run: Raymond, B. U., 1 min. 59.4 sec.; Stowell, Vt.; Quackenbush, Middlebury; Quinlan, Tufts.

220 yd. Hurdles: Bloom, Conn., 26 sec.; Motten, Trinity; Clapp, B. U.; Newton, Tufts.

220 yd. Dash: Fritch, W. P. I., 22.8 sec.; Williams, Middlebury; Johnson, Conn.; Thompson, Middlebury.

Pole Vault: Tie—Anderson, Conn., and Pacelia, Trinity, 11' 6"; third, tie—Abbot, Vt., and Motten, Trinity.

High Jump: Tie—Riley, Mass. State, and Wilson, Tufts, 5' 7 3/4"; third, tie—Heusser, Trinity, and Wackerbath, W. P. I.

Javelin Throw: Crompton, B. U., 170' 10"; Minalga, W. P. I.; Adams, Mass. State; Chotkowski, Trinity.

Broad Jump: Bloom, Conn., 22' 3/4"; Buarnaccia, Middlebury; McGowan, Mass. State; Tappin, Mass. State.

### The score by colleges:

Boston University	32
Connecticut State	31
Worcester Tech	29 1/2
Tufts	20
Middlebury	17
Trinity	13
Vermont	11 1/2
Mass. State	11

the Frosh pulled their opponents through the Institute pond in the time of 12 minutes. This was the first time since 1930 that the Sophs were pulled through the pond. This first victory gave 1941 a large lead of 3-0.

On the following Saturday, between the halves of the Mass. State game, the Frosh beat the Sophomores, on another muddy field, in the annual paddle rush. Only about 30 Sophs showed up, and

## Score 11-10 in Saturday's Game on Brookline Field; Third Loss For Tech in Five Starts

# Tennis Team Loses Match To Gymnasts

## Brand, in Endurance Contest Takes Only Win From Springfield

On Saturday the tennis team made its first trip of the season, taking on the Springfield College team on the Forest Park's fine clay courts in Springfield. It was the netsters fifth match of the season and their fourth loss, but the score of 5-1 does not give the team credit for the closeness of the scores. The weather was perfect for tennis, but strange courts (even though ideal) and heavier-than-usual tennis balls accounted for many errors of the Worcesterites. Ronnie Brand was the only one to pull through with a victory, 6-2, 11-9. In his second set Ron had a set point in his favor at 5-3, but his opponent, Bob, started off on a new spurt to extend the games to a hard set. Captain Nimmo and Bill Bosworth, though not proving effective in their singles, came back to take a set in their doubles. Neither one was up to form, but rainy weather of the past week has afforded little practice. Brand teamed up with Bob Dunklee in the second doubles, but lost out in the end despite a hard three-set match. In their third set, they pulled from behind at 5-3, set point, to tie the score, but then succumbed in the next two games.

Next week the team meets Providence College on Tuesday, Trinity here on Thursday, and Tufts at Medford on Saturday. Rumor has it that Tech is winning at least one of these three!

# Bodreau and Rushton Have Field Day, But Jack Injures Knee in Sixth

In its fifth start of the season, Tech's baseball team dropped a tough game to Northeastern on the Northeastern field in Brookline by a score of 11-10 on Saturday. Hardest hitter for Tech was Bodreau, catcher, who had a double and two triples to his credit in five times at bat. Jack Rushton repeated last Saturday's performance with a home run in the fourth. He sent home Gustafson and Raslavsky, accounting for three runs. Jack also sent home Carroll and Forkey in the third on a single. In the sixth frame, with Al Raslavsky on, Jack hit a fast liner to right field. He tried to stretch it into a double, as Al came home, but changed his mind. On turning to go back to first, Jack's knee, which had troubled him during the basketball season, gave out on him and he had to be helped from the field.

Tech opened up with a two-run lead in the first, as Raslavsky's triple sent home Carroll and Forkey. Northeastern pulled up with one run in the same inning. In the second, Bodreau, gone to third from his double, came home on Lambert's double to make the score 3-1. Northeastern, however, piled up five runs in the second by batting around, with one walk, three singles, and two doubles, and they then were on the long end of the score, 6-3. Tech gathered in two more runs in the third frame as Carroll and Forkey, on bases by balls, were in on Jack Rushton's single. The story now stood 5-6, with Tech the underdog. In the fourth, three runs sent Tech ahead, 8-6. Gustafson walked, Raslavsky was hit by the pitcher, and Rushton hit a homer. By way of retaliation, the Huskies pulled down another marker in the fifth, to make the score 8-7. Things looked pretty good in the sixth. Raslavsky hit a triple and was in on Rushton's single. Rushton was taken out of the game. Bodreau hit a three-bagger and Scott singled and sent him home. Tech now stood ahead, 10-7. But in the seventh box, the Huskie pitcher stepped up to the plate to send a home run out to deep center field. Another man walked

and a single pushed him in. Then in the eighth, a man on base by being hit with a pitched ball came home on a single to tie up the score at 10-10. In the ninth, Tech's chance to win, three pop flies left a blank box. In the last of the ninth, a man hit by a ball romped around and came in on a single, to spell defeat for Tech, to the tune of 11-10.

Score by innings:

### Goat's Head

(Continued from Page 3, Col. 3)

the 75 Frosh easily overpowered them and emerged from the melee with 53 paddles against 22 for the Sophs. With two more points to their credit, the class of '41 were well out in front with a score of 5-0.

The class of 1941, now something of a juggernaut, swept over the class of 1940 in one more crushing defeat in the interclass track meet. With Naboi-check gathering 18 points, and Fraser 14, the yearlings trounced the Sophs by a score of 85-32 on a field that was again good and wet. Outstanding opponent of the Freshmen was Hector Cameron, taking two first places. With two more markers added, the score rested 7-0 for the Frosh with victory close at hand.

Then came Waterloo. Saturday, November 13th, dawned wet and muddy, which, if the foregoing contests meant anything, assured the Freshmen of a banner day. Nevertheless, in a driving rain, the class of 1940 valiantly stemmed the tide by defeating the Freshmen in football and soccer games, and reviving hope for a chance at the Goat's Head Trophy. Scores were: football, 6-0; soccer, 2-0. Although the Freshmen needed only two points for the trophy, things looked a little more even now, with the score standing 7-3.

The Sophs, inspired by this victory, then downed the Frosh in a close basketball game by 29-26. It was anybody's game until the last few minutes when '40 drew ahead and maintained their lead until the end. Basketball scored a double marker for the Sophs and brought the count to 7-5.

With the interclass swimming, it began to look like a Jack Dalton finish for the Sophs when they swamped the Frosh to bring the total up to 7-6. However, the Freshmen had a say in the matter and said it. In the rifle match, 1941 easily took another point to make the score 8-6.

With the bowling, the Frosh chalked up the one remaining point necessary to make the trophy theirs. The score now stands 9-6, and as there are only 17 possible points, the class of 1941 has earned possession of the '93 Goat's Head Trophy. They are by no means lying down on the job in tennis and golf, which are still to be played. These two matches will be played immediately after the close of varsity seasons in these two sports.

## Ninety Couples Brave

### Rain For Dorm Dance

(Continued from Page 3, Col. 4)

June 4, a Saturday night, in the gym, the Boyntonians will play the last time together for this season. That night will also be Banan's last night. This dance will be extraordinary, not because it will cost one dollar a couple, but because the superlative music of the Boyntonians will have the additional support of several individual exponents of rhythm, harmony and swing from New York.

June 4 will be the last night when all Worcester Tech men can get together, so what say let's make it a real night of relaxation and harmony in anticipation of final exams.
